

# RLM - G998

## Wall Mount:- Remote Tyre Inflate/Deflate Station - Pressure Check Station -

### Features

- Australian made
- Design and engineer approved
- Compliant to Australian Standard AS2971-2
- Wall Mounted with adjustable brackets to accommodate various fixing points, anodized surface coating for weather protection.
- High Quality 100mm Gauge, 0 - 160Psi in 2 Lb increments.
- Quality made components – Italian / German / Japan / USA / Australian
- Supplied with the following documentation:
  - Operations Manual
  - Certificate of Conformance
  - Recorded Serial Number

### Operational Features

- Designed for safe remote inflation and deflation of tyre / wheel assemblies.
- Tyre inflation -: Air inlet via ¾" shut off valve, with a ¾" outlet to claw coupler for tyre filler hose connection.
- Tyre Deflation -: Air exhaust via a ½" lever valve through an exhaust silencer.
- Tyre pressures -: monitored via a 100mm L/F dial gauge. (Calibration Certificate on request)
- The manifold is also furnished with small and large bore check valves, to allow for calibration checks on hand held, field service gauges.
- RLM offer full backup support – Spare Parts – Servicing – Gauge Recalibration

Supplier of Tyre and Wheel Servicing Products
